

Just To Let You Know

Next Week

We will be learning how to write the remaining 'curly caterpillar letters' which are f, s and e. If you would like a sheet of all the letters to have at home, please take one from the wallet outside your child's classroom.

In maths we will be learning about length. For example, 'How many hands or feet long is a chair?'

We are also looking forward to a body carousel where the children will be going to different zones in groups and learning about different areas of the body! We will post some photos next week.

Donations

If you happen to be having a sort out at any time, we would be very grateful for any dolls or bathroom scales for our role play areas as well as cushions for our cosy corners. We are also in need of recycled junk for junk modelling.

Due to allergies however, they need to be **egg/dairy/nut free**. Office based boxes, toiletries, non dairy drink bottles, old wrapping, ribbon, tubes etc would be very welcome!

Wild Place

There is a sign up sheet in the corridor outside Willow Class if you are willing and able to help us on any Wednesday afternoons this term.

Hazel & Willow

Body LEAP!

The children have enjoyed looking at books from the library as a way of finding out information about the body. The children have been learning about different body parts and making labels on a display in each of the classrooms.

We read the story 'Funny Bones' by Janet and Allan Ahlberg and made skeleton related pictures and crafts.
