Maths

We have been practising our subtraction and finding strategies to help us. Can you answer the number sentences below and explain how you worked them out? Draw a number line from 0-100, check you have all the numbers in the correct order. Use it to help you:

21-11=   35-9=   40-21=

75-22=   99-15=

Don't forget to count back in 1's and 10's! If you use a hundred square to help you, show your grown up the magic of jumping lines when you are taking away 10's.

Topic Fun

Now that we have come to the end of our Great Fire topic we started to learn about 'forces' in our Rocket Scientists mini topic. We are making our own stomp rockets, paper aeroplanes, parachutes and catapults. We have been experimenting to make them go further, faster, higher.

I'm Bored Box

Have a go at making paper aeroplanes using different materials (paper, thin card or something else). Which ones fly the best? Why? How can you improve your design to make it fly better?

Things to Remember

Mufti Day Monday 25th
Monday is the day to bring your contributions for the Christmas Fair.

Christmas (Play) is Coming!
Look out for lines and songs to be learned/costumes to be provided/help needed in the next few days! If you have any talents in making costumes please let us know.

Group Reading
Thanks to some more lovely volunteers we will now be able to offer more group reading for your children. Meanwhile please bear with us while we organise the new schedule.

High Frequency Words
We are sending home a list of 200 High Frequency Words that children should be able to read by the end of Year Two.

Writing Corner

Next week we will be starting to talk about what is really important to us: friends, love, happiness, our environment or our faith. Ask Mum or Dad to help you find a prayer or poem or famous saying that helps to explain what is important. Please bring it to school with you next week.

Friday 22nd November 2013

Group Reading is Chestnut Class next
