

Just to let you know...

Words of the week

museum	careful
science	hopeful
investigation	boastful
switch	cheerful
battery	achievable
buzzer	breakable
magnetic	renewable
magnetism	washable

Please remember to send in your unwanted metal. Old tins, saucepans, trays and anything else you can find. The more you send in the better our model Iron Men will be.

In Group Maths this week we have continued to learn about fractions. Working out fractions of number and shape.

In Class Maths the children have continued looking at the properties of 2D shapes. Do you know your Octagon from your Trapezium?

<http://www.freewebs.com/weddell/Equiv%20Fractions%20Contents.html>

Our weekly times tables and spelling tests are going well. Times tables tests are on Thursdays and Spellings on Fridays. Please ask your child which set of times tables they are working on.

Thank you for helping out at home.

In Science we have been exploring simple electrical circuits. We have been using bulbs and buzzers to set a trap as a birthday surprise for The Iron Man.

Key Questions -

What is a conductor and an insulator?

What effect does more battery power have on the light bulb?

Could you make a battery out of lemons??

In English we have been continuing with our poetry and taking an in depth look at adjectives, nouns, verbs and adverbs. The children have compiled lists of words and are making up their own poetry using their lists. There are some great websites to test your knowledge!
