

## Curriculum News:

### English:

This week we have been working on alliteration, using them to create interesting headlines. We have also focused on syllables and have created our own rain haikus!

### Maths:

Our numeracy work this week started with a bang! We all used our knowledge and understanding of place value and partitioning to rescue Richard. For the rest of the week have been focussing doubling and halving. We have used a shrinking potion to make sure Noah can fit through the ark door and have doubled quantities of food to feed all the animals.

### Topic:

In science we have continued our investigations into floating and sinking by designing our own plasticine boats. How many dice did your child's boat manage to hold? We have also started our work in geography and have gone on a fact finding mission to discover more about our planet.

### Reminders:

- Please remember PE is every Monday and Wednesday. Trainers are a must!
- Well done for all the fantastic reading that is going on at home! Please do ensure that Reading Journals come into school every day. We have been having a great time on our reading carousel completing lots of different activities!
- Marwell Zoo: Thursday 9th October. Thank you for the amazing response for helpers. Please make sure that your child brings back their permission slip.
- Payment is now online on the ParentPay site.

It's been another lovely week and we are happy that the children seem to have settled in well.

Best wishes

Ginnie, JJ and Claire.
